

RODEXIT

STOP MICE AND RATS BEFORE THEY GET IN

To find out more visit www.thebritishrattrap.com/rodexit/

"It took no time at all to install it. This is what I like about the RodeXit door sweep. I've spent only 5 minutes on installation."

*Sergey Nemykin,
president of Industrial Pest Elimination*

ECO FRIENDLY INDUSTRIAL GRADE RODENT EXCLUSION PRODUCT

For commercial and residential applications. Engineered for versatility, strength, flexibility, efficiency and performance.

RODENT PROOFING WITH RODEXIT

- RodeXit is a robust, industrial-grade, cost-effective solution, designed for protection against mice, rats, bugs, drafts and higher or lower outdoor temperatures.
- Scientifically tested proven technology.
- The distance between the wires is only 0.2 inch (5 mm), so the gap is too narrow for even small mice to get through.
- The rodent-proof barrier consists of ten 0.04 inch (1 mm) thick solid stainless-steel wires, that no rats can gnaw through.
- Environmentally friendly

RODENT PROOFING IS THE MOST EFFECTIVE METHOD OF EXCLUSION FOR COMBATTING MICE AND RATS.

WHY **RODEXIT** IS THE FUTURE OF RODENT PROOFING

TOUGH ON RODENTS

- Protection against bugs, drafts, higher/lower outdoor temperatures.
- The RodeXit proofing strips repel even sustained rat attacks.
- Wear and climate temperature swing resilient material (Polymer Santoprene™ 201-73), reinforced with embedded stainless-steel wires.
- Simple and easy to install
- Industrial-grade quality for commercial and residential applications.

RODEXIT STRIPS

- 27 yard roll/coil x "2.6" Pliable ruggedized rodent protection strip material with embedded stainless-steel wires.
- Two different versions available of RodeXit rodent proofing strips
 1. Wave shaped for threshold gaps under door leaves of manual doors
 2. Straight for astragal gap of double doors and gaps in or between stationary building parts, fences and walls
- Packaged for portability convenience in a box.
- The optional SHIELD protection strip of sturdy stainless-steel can protect the RodeXit WAVE door sweep against being damaged by coliding pallet jacks passing through the doors of commercial buildings."
- Mounting block tools for easy quick installation.

NECESSARY TOOLS

- Cordless screwdriver.
- Tin snips.
- Stanley knife.
